A screenshot of a web browser window showing the w3schools.com JavaScript exercise page. The browser's address bar displays the URL "w3schools.com/js/exercise_js.asp?filename=exercise_js_dom_html9". On the left side, there is a dark-themed sidebar containing a list of JavaScript topics, each followed by a checkmark icon, indicating completion. The topics listed are: JS Strings, JS String Methods, JS Arrays, JS Array Methods, JS Array Sort, JS Dates, JS Math, JS Comparisons, JS Conditions, JS Switch, JS For Loops, JS While Loops, JS Break Loops, and JS HTML DOM. Above this list, there are buttons for "Sign Up" and "Log in", and a message stating "Completed 67 of 67 Exercises:". The main content area on the right has the heading "Exercise:" followed by the instruction: "Use the eventListener to assign an onclick event to the <button> element." Below this instruction, a large light green box contains the word "Correct!" in a bold, green font.
